

ZION Technology – SEO Developer Fix Checklist

Developer handoff checklist based on the supplied SEO audit. Complete P0 first, then P1/P2/P3.

P0 — MUST FIX FIRST

Issue / Area	Page / Scope	Priority	Developer Action	Verify
Empty / CSR HTML	/allcourses/web-designing	CRITICAL	Implement SSR, SSG or reliable prerendering. Server response must contain real HTML, not only an empty app shell.	View Source contains body content.
H1 missing from raw HTML	/allcourses/web-designing	CRITICAL	Render exactly one H1 in server HTML: "Web Designing Course in Chandigarh".	View Source + GSC HTML.
Main content not server-rendered	/allcourses/web-designing	CRITICAL	Server-render hero, intro, headings, syllabus and important links; do not rely on JS to create SEO content.	Disable JS / inspect source.
Canonical + www consistency	Sitewide	HIGH	Choose one preferred HTTPS hostname; 301 all alternate www/non-www versions; output self-referencing canonical.	Test all hostname variants.
Google rendering verification	Course page	HIGH	Use GSC URL Inspection → Test Live URL → inspect tested HTML after deployment.	H1/content visible to Google.

P1 — ON-PAGE SEO

Issue / Area	Page / Scope	Priority	Developer Action	Verify
Title tag	Web Designing page	HIGH	Use local intent. Suggested: "Web Designing Course in Chandigarh Industrial Training - Zion Technology".	Check .
Meta description	Web Designing page	HIGH	Mention Chandigarh, technologies, practical training, projects/placement and CTA naturally.	Check meta tag.
H1–H6 structure	Web Designing page	HIGH	One H1; logical H2 sections; H3 module headings. Do not use headings only for styling.	Inspect DOM/source.
Course content	Web Designing page	HIGH	Add syllabus/modules: Figma, UI/UX, HTML5, CSS3, Bootstrap/Tailwind, JavaScript, responsive design, WordPress as applicable.	Content crawlable without JS.
Course information	Web Designing page	HIGH	Show duration, mode, eligibility, certification, fees/EMI if offered, batches and placement assistance if actually provided.	Visible in HTML.
Internal linking	Sitewide	HIGH	Link from homepage, course hub, relevant training pages and relevant blogs to this course using natural descriptive anchors.	Crawler can reach page.
Navigation link	Sitewide	HIGH	Courses → Web Designing should directly link to canonical URL with descriptive anchor text.	Inspect header HTML.
Course Schema	Web Designing page	HIGH	Add valid schema.org Course JSON-LD using only accurate on-page facts.	Validate structured data.
FAQ + schema	Web Designing page	HIGH	Add useful FAQs on duration, syllabus, eligibility, mode, fees, batches, certification and placement; implement valid schema where appropriate.	Validate schema + visible FAQ.

P2 — TECHNICAL SEO

Issue / Area	Page / Scope	Priority	Developer Action	Verify
XML Sitemap	Sitewide	HIGH	Generate/update sitemap with canonical indexable URLs; remove redirects, 404s and noindex URLs.	Open/validate sitemap.
Robots.txt	Sitewide	HIGH	Do not block important course pages or resources required for rendering; include sitemap location.	Test important URLs.
Mobile rendering	Sitewide	HIGH	Ensure important content/navigation works on mobile and primary content is not hidden.	Mobile test.
Core Web Vitals	Sitewide	HIGH	Optimize LCP, INP and CLS: reduce JS, optimize images/fonts, prevent layout shifts.	PageSpeed + GSC.
Image ALT	Sitewide	MEDIUM	Use descriptive ALT for meaningful images; empty ALT for decorative images; no keyword stuffing.	Inspect image HTML.
Breadcrumbs	Course pages	MEDIUM	Add visible breadcrumbs and BreadcrumbList schema where appropriate.	Check page + schema.

Issue / Area	Page / Scope	Priority	Developer Action	Verify
Duplicate content	Course/location pages	HIGH	Audit Chandigarh/Mohali/location variants. Keep unique useful content; canonical/redirect truly duplicate pages; avoid mass near-duplicate city pages.	Compare content + canonicals.

P3 — TRUST / LOCAL / SUPPORTING SEO

Issue / Area	Page / Scope	Priority	Developer Action	Verify
Trainer credentials	Course pages	MEDIUM	Add genuine trainer expertise, experience and credentials where available.	Visible on page.
Testimonials	Course pages	MEDIUM	Add genuine student reviews/results relevant to web design; never fabricate.	Visible/authentic.
Contact & location signals	Sitewide	MEDIUM	Keep business name, address/area, phone and contact details consistent where applicable.	Check header/footer/contact.
Local relevance	Course pages	MEDIUM	Naturally explain Chandigarh/Tricity relevance and actual training location/service area.	Review content.
Unique metadata	Sitewide	MEDIUM	Every indexable page should have a useful, unique title and meta description.	Crawl site.
Broken links / 404s	Sitewide	MEDIUM	Repair internal broken links; redirect only to relevant replacements.	Crawl site.
Indexability	Sitewide	HIGH	Check status codes, noindex, canonical, redirect chains and robots blocks on important pages.	Crawl + GSC.
Orphan pages	Sitewide	MEDIUM	Ensure important course pages have contextual internal links from relevant pages.	Internal-link report.

FINAL DEVELOPER ACCEPTANCE TEST

1. View Source of /allcourses/web-designing contains the H1 "Web Designing Course in Chandigarh".
2. View Source contains the main course introduction/content, not only .
3. Important H2/H3 headings and internal links are present in server HTML.
4. Title, meta description and canonical are correct.
5. Preferred HTTPS www/non-www version is enforced with 301 redirects.
6. Google Search Console Test Live URL shows the page correctly rendered.
7. Sitemap and robots.txt are accessible and correct.
8. Mobile rendering and Core Web Vitals are checked.
9. Course/FAQ/Breadcrumb schema is valid and contains only accurate information.
10. No important page has accidental noindex, 4xx/5xx, broken canonical or blocked crawling.
11. After deployment, request indexing for the corrected page in Google Search Console.

Source note: The supplied audit specifically identifies the empty/CSR HTML and missing H1 in raw HTML for /allcourses/web-designing. Sitewide items in this checklist are developer audit requirements and should be confirmed page-by-page rather than assumed broken everywhere.
